FUTURE FLAG

Company

Future Flag Co., hereafter referred to as GECC is Saudi owned Company (CR No. 7052763146) Saudi Aramco Vendor Registration formed under Saudi Arabian Law and Regulation.

The Company was formed with the intention to create a leading, nationwide client of cost-effective, flexible solutions for Construction, Inspection (Quality & Manufacturer/ Vendor Inspection), Procurement, Execution, Technical Maintenance Operations and Technical Support Services (Industrial).

We integrate our operations/support services for our client's benefit, milestone and project accomplishment. We share knowledge, resources and service throughout our organization. Across the country we have ability to provide our customers with a full range of technical service supported by a collective knowledge base.

FFC is one of the companies providing Engineering support services to all Industrial, Construction and Operational sites in the Kingdom of Saudi Arabia.

FFC is a leading Saudi company specializing in engineering, design and construction management services for landscape and irrigation projects. Based in Al-Khobar.

We provide innovative and cost-effective solutions across power, industrial and infrastructure sectors, ensuring safety, quality, and environmental stewardship in every project, we undertake.

FFC provides a complete range of Engineering, Technical, Maintenance and Management Consultant Services:

Construction, Maintenance for: Oil refinery, Gas processing, Pipeline, Chemical, Petrochemical Industry;

1. Quality Testing & Inspection.
2. Manufacturer (Vendor) Inspection and Expedition.
3. Project Temporary Facilities and Office Automation.

With a network of experienced technical consultants in multiple disciplines, the GECC focus is to provide experienced, value-added service to clients in Saudi Arabia, Gulf Coast Countries (GCC), and the Middle East. We currently have personnel working in many international locations.

CEO MESSAGE

Future Flag Company (FFC) offers a “one-stop shop” for project development, value added manufacturing, plant maintenance, construction, and other related services.

Future Flag Company (FFC) is established to provide reliable and competitive engineering solutions to customers, with a view to narrow the widening gap between demand and supply fueled by the unprecedented upturn of the business. With the backing of experienced management of accomplished professionals, **Future Flag Company (FFC)** has all the elements; technology, management systems, people and financial strength to become a leading service provider in the region.

Future Flag Company (FFC) team will serve its customers with dedication and commitment in successfully delivering the projects while recognizing its responsibility as a corporate citizen for the sustainable development.

Our vision is to be recognized as a professional body that provides cutting edge project management solutions to the world.

The execution of strategy to balance near term profitability with long term growth has positioned the Company to look into asset development projects and technological alliances.

The team is excited about the business opportunities that exist in the market today and confident to pursue its business acquisition and fulfillment plans.

It is now for our valued Customers to decide about how far **Future Flag Company (FFC)** has succeeded in meeting or exceeding their expectations and tell us how we can serve them better.

COMPANY MISSION

Our mission is to provide high quality Electro Mechanical, Civil Construction Services, Inspection and other related services for Petrochemical, Oil & Gas industries in Saudi Arabia

FFC personnel work closely with the client's management to ensure that all project requirements and objectives are met. MDCE personnel assure that the customer receives quality products that are fit for purpose, reduce the risk of schedule delays and cost overruns on multi-million-dollar capital equipment, facility upgrade or refurbishments projects. With measurable results, our client's consistently use independent inspection, expediting, quality control, engineering, and project management consulting services to achieve their desired goals.

INNOVATION & TECHNOLOGY

We strive to transform traditional landscaping and irrigation practices through the integration of advanced technologies and environmentally conscious solutions that align with Saudi Vision 2030.

SMART IRRIGATION SOLUTIONS

Real-time environmental analysis with automated scheduling to reduce water consumption and enhance plant health.

IOT & CLOUD-BASED MONITORING

Full operational visibility through IoT connectivity and intelligent control software for data-driven management.

RENEWABLE ENERGY INTEGRATION

Photovoltaic systems and thermal water solutions for sustainable energy management.

SUSTAINABLE LANDSCAPE DESIGN

Creating visually appealing, functional, and enduring green spaces that support biodiversity and climate resilience.

OUR SERVICES

Project Execution:

Complete execution from concept to completion with precision, quality, and adherence to time lines and budget.

Design & Engineering:

In-house team develops innovative, sustainable, and cost-effective solutions tailored to project requirements.

Operation & Maintenance:

Comprehensive O&M and facility management services ensuring long-term performance and reliability.

Supply & Installation:

High-quality materials and components for irrigation, landscaping, and infrastructure systems.

Automation & Smart Solutions:

Advanced automation technologies including smart controllers, moisture sensors, and centralized monitoring systems.

Future Flag offers extensive capabilities through the following service lines to support the needs of our clients.

The Nature of our Business as follows :

- Material Supply
- Maintenance & Operation
- Construction / Project Supervision (Electro- Mechanical, Civil)
- Equipment Rental

Technical Inspection Services :

- Third Party Inspection/Vendor Inspection
- Supplier Inspection & Expediting
- In-Service Inspection
- Technical Auditing / Supplier Assessments
- Chief Surveyor with equipment

Technical Staffing Services :

- Contract Staffing
- Permanent Placement Services

Consulting and Training :

- Behavior-based Safety Training
- Leadership Training
- Welding and Materials Training
- HSE Training

The followings are summary of services provided by **Future Flag Company (FFC)**:

MAINTENANCE & OPERATIONS

As we are pioneers in this field, we undertake industrial maintenance and would be completed within the specified period of the contract agreement. Though we have our own skilled personals. As quality surveying and inspection of electrification. Structure of building of mechanical plants. We undertake even operational works without any hesitation to full fill our customers satisfaction. We provide maintenance services for civil works such as excavation, back filling, all type of electrical, mechanical repair woks for industrial demands.

MAINTENANCE OF BUILDINGS

Access to best-in-class research & development, continuous identification and delivery of optimization projects, cost reduction targets and guarantees in terms of safety, reliability, quality, quantity and respect of environmental regulations. Our systematic approach to process and systems functions and application of effective preventive and predictive maintenance tasks. We make sure our Q & M solutions are suitable to your situations by carefully working together to identify your needs.

CEILING SYSTEMS

We provide comprehensive ceiling solutions for commercial, industrial, institutional, and residential projects. Our experienced team specializes in fabrication, installation, maintenance, and renovation of various ceiling systems in accordance with international standards and project specifications.

Our Ceiling Services Include:

- False Ceiling Installation
- Decorative & Non-Decorative Ceiling Systems
- Gypsum Board Ceilings
- Aluminum Ceiling Systems
- Acoustic Ceiling Systems
- Metal Ceiling Tiles
- Micro Perforated Ceiling Panels
- Aluminum Plank Ceilings
- Linear, Baffle & Rib Ceilings
- Ceiling Suspension & Framing Systems
- Structure Fabrication & Installation
- Ceiling Repair, Maintenance & Renovation Works

DUCTING & HVAC SERVICES

Future Flag provides complete HVAC & Ducting Solutions for residential, commercial, and industrial projects.

Our Ducting & HVAC Services Include:

- HVAC Duct Fabrication & Installation
- GI, SS & Aluminum Ducting
- Pre-Insulated Duct Systems
- Fresh Air, Exhaust & Ventilation Systems
- Kitchen Exhaust & Smoke Extraction
- AHU, FCU & Fan Maintenance
- Duct Cleaning & Leakage Testing
- HVAC Repair & Troubleshooting
- Testing, Balancing & Commissioning
- Preventive Maintenance

PLUMBING SERVICES

We offer professional plumbing installation, maintenance, repair, and support services for industrial, commercial, and residential facilities. Our qualified technicians ensure reliable and efficient plumbing systems that comply with industry standards and safety requirements.

Our Plumbing Services Include:

- Water Supply & Drainage Systems
- Pipe Fabrication & Installation
- Plumbing Repair & Maintenance
- Leak Detection & Pipe Replacement
- Water Pump Installation & Maintenance
- Water Heater Installation
- Valve & Sanitary Fixture Installation
- Water Tank Connections
- Emergency Plumbing Services
- Preventive Maintenance

GENERATOR (GEN-SET) SERVICES

We provide complete Generator Set (Gen-Set) maintenance, repair, troubleshooting, testing, and support services to ensure uninterrupted power supply and optimum equipment performance.

Our Gen-Set Services Include:

- Generator Installation & Commissioning
- Preventive & Corrective Maintenance
- Engine Overhauling
- Alternator Inspection & Repair
- Generator Troubleshooting
- Load Bank Testing
- Fuel System Maintenance
- Cooling System Maintenance
- Control Panel Diagnostics
- Battery Inspection & Replacement
- Emergency Breakdown Support
- Annual Maintenance Contracts (AMC)

ELECTRICAL WORKS

Our success is due to dedication to client satisfaction diverse experience, professionalism and continual focus on improvement particularly in the field of sustainable design. All our Directors participate in the business and our long-established culture of managing projects in a well-organized and disciplined way ensures we give clients what they need, when they need it. Our mechanical and electrical consulting engineers work as an integrated project team to provide complete building services solutions.

CIVIL & MECHANICAL WORKS

Our project methodology is straightforward, first to understand specific project requirements with respect to brief, quality, Budget, time and cost as well as any operational and environmental constraints before delivering high quality engineering Solution with full regard to operation, ease of maintenance and whole life costs.

- Project Piping Fabrication and Erection Works
- Equipment (vessels, column heat exchanger, Drum, Pumps Installation works
- Steel Structure Fabrication and Erection Works
- Civil Construction works

➤ INSPECTION SERVICES :

Mechanical, Structural, Rotating Equipment, Process equipment, Pressure Vessels, Weld, Subsea Equipment, Coatings, Electrical and Instrumentation.

➤ WELDING CONSULTANCY :

Procedure Development, Procedure Review, Welder Qualification, Welding Application Evaluation, and Welding Productivity Evaluation

➤ QUALITY DOCUMENTATION SERVICES :

Development, Review or Management of Quality Manuals, MTR, SDRL, Data Books, Quality Plans, Shop Routers, and Technical Specifications.

➤ PROJECT MANAGEMENT SERVICES :

Client Interface, Technical Supervision and Quality Management for capital projects including Refineries, Petrochemical Plants, Offshore Production Platforms, Production Equipment and all associated Fabrication, Construction and Installation both offshore and onshore.

➤ MANPOWER & EQUIPMENT SERVICES :

We offer comprehensive manpower and equipment services to support construction, industrial, mechanical, and infrastructure projects. Our solutions are designed to provide reliable resources that enhance productivity, ensure safety compliance, and meet project timelines efficiently.

➤ MANPOWER SERVICES :

We supply qualified and experienced manpower for short-term, long-term, and project-based requirements, including:

- Skilled and semi-skilled technicians
- Unskilled labor and helpers
- Site supervisors and foremen
- Welders (ARC, TIG, MIG)
- Pipe fitters and fabricators
- Electricians and plumbers
- Mechanical and civil technicians
- All personnel are deployed in compliance with local labor regulations and HSE standards.

➤ EQUIPMENT SERVICES :

We provide well-maintained and certified equipment on rental or project basis to support site operations, including:

- Pipe bending machines
- Welding machines and accessories
- Generators and air compressors
- Lifting equipment and tools
- Power tools and hand tools
- Construction and maintenance equipment
- Backhoe Loader with Jack Hammer with ARAMCO Certified Operator
- 2026 Model Cranes with all safety.

Non Metallic Piping

RTRP Piping, Under Ground /Above Ground

GRP Piping ,UG/AG, Oily Water,
Potable Water, Sanitary Water, Fire Water

HDPE Piping

PE/PVC Piping

TECHNICAL CAPABILITIES

ENERGY PORTFOLIO :

- **Thermal Water Systems:** Medium to large scale systems for industrial and commercial use.
- **Photovoltaic:** Design, modeling, and detailed engineering for PV systems from 0.5 MWp to 15 MWp range.
- **Remote Monitoring & Optimization:** Digitalization to improve performance of energy assets with custom IIoT device development.

TECHNOLOGY PORTFOLIO :

- Building Management System (BMS)
- Process Automatic Control & Monitoring Solutions
- Instrumentation & Information Technology Solutions
- Communication & Maintenance Management
- Expert Services for Testing, Commissioning & Training

QUALITY ASSURANCE & SAFETY

FFC adheres to the highest standards of Quality Assurance and Quality Control in every phase of operations — from design and procurement to installation and maintenance.

Strict Quality Control :

Systematic inspections, documentation, and testing ensuring materials and workmanship meet specifications.

Safety as Core Value :

Proactive HSE policy designed to prevent incidents and protect our workforce.

Compliance & Sustainability :

Commitment extends beyond compliance — reflecting responsibility toward clients, employees, and environment.

ONGOING PROJECTS

Sub Client **JGC Gulf international Co. Ltd.**
Service Area Due point control unit (DPCU)
Main Client Saudi Aramco
Location Baqaiq, Eastern Province, Saudi Arabia

Sub Client **Sinopec Services**
Service Area Tamimi RC Workshop
Main Client Saudi Aramco
Location Al Jubail, Eastern Province, Saudi Arabia

Fabrication of pipe spool apex 86000 dia inch

FINALIZED PROJECTS

MAJOR PROJECTS

FEATURED PROJECTS

FFC has successfully executed and handed over numerous landscape and irrigation projects across diverse sectors, demonstrating our capability to meet the highest standards.

Delivered NEOM Projects :

- NEOM Residential Camps NRC11 - Softscape
- NEOM Residential Camps NRC12 - Hardscape
- NEOM Residential Camps - Landscape Irrigation
- NEOM Command & Control Center Sharma - Landscape Lights
- NEOM Facilities - Solar Lights
- Shigri Airport NEOM - Solar Lights

CLIENTELE

Diverse Clientele :

FFC serves a diverse and esteemed clientele including government authorities, private developers, consultants, and contractors. Our projects span public parks, urban developments, residential communities, commercial complexes, and large-scale infrastructure initiatives.
